When it comes to a Build-to-Suit partner, Van Buskirk Companies offers our own proven Design-Build process to help you plan, design and build an office and industrial space using the most cost-efficient methods available. Our senior construction management team oversees the entire project from start to finish, keeping quality up, costs down and expectations high. When you work with Van Buskirk Companies, you are working with 50 years of company history.

Not only do we help you build your dream, we can help as a financial partner by leveraging our equity and offer lease and/or purchase options. Owners of Van Buskirk Companies will work closely with you to find the best financial option for your business.

LEADERSHIP TEAM

STEVE VAN BUSKIRK
President of Land Development

Steve has over 25 years experience in construction, master-planned developments, governmental entitlement work, and brokerage. He graduated from the University of Minnesota with an MBA in Finance. Along with the rest of VBC's residential and commercial development team, he works residential and commercial projects from start to finish. Whether it is land development or building projects, he will help ensure the details are managed.

MIKE VAN BUSKIRK
President of Operations

Mike is a licensed real estate broker and mechanical engineer who holds decades of experience in property management, leasing, selling and development of commercial and residential properties. Currently, VBC manages over a million square feet of commercial properties and 560 apartments in the area.
